

WASTE OIL Self Bunded Tank Cubes: 1000L, 3000L, 4500L & 6000L Sizes

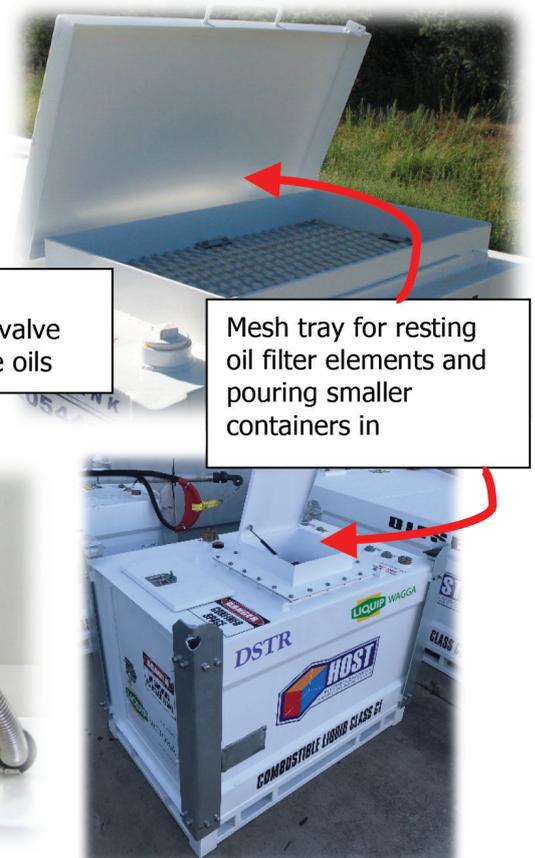

Liquip Wagga now offers a range of small HOST SBT Cubes designed for the safe and clean storage of waste oils. They are an ideal reciprocal for pouring in small containers of waste oil or draining oil filters (via the meshed top hatch) and keeping these liquids stored for later removal. Also, by using an attached pump system waste oils from larger drums and storage vessels on sites can be easily extracted and placed in the tank, extending on this tanks versatility.

Tanks Features:

- ▶ Hatch design has a basket mesh kit to cater for draining oil filters overnight and still allow for other waste oils to be drained at the same time. Hatch lid can be closed when oil filters are draining.
- ▶ Extraction pump system for larger waste oil containers and drums to transfer into the tank.
- ▶ Draining point for pouring in waste oils.
- ▶ Self Bunded Tank (double wall) design for safer storage.
- ▶ Separate waste oil tank emptying suction point.

Pneumatic pump with control valve and wand for extracting waste oils

Mesh tray for resting oil filter elements and pouring smaller containers in
